THE REPORT
OF THE
PRESIDENT OF QUEEN'S COLLEGE, BELFAST,
FOR THE
YEAR 1904-1905.

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

In pursuance of the duty laid upon me by Act of Parliament, I have the honour to present to Your Majesty my annual Report on the condition and progress of Queen's College, Belfast, during the academic year 1904-5.

In accordance with custom, I begin by speaking of

THE NUMBER OF STUDENTS

on our books during the session. Last year I was able to report a noteworthy advance in this particular, and this year it is pleasant not only to be able to say that this advance has been maintained, but that still further progress has been made. It is also satisfactory to find that the increase in our numbers is not confined to any one of our departments, but has characterised all the Faculties of Arts, Medicine, Law and Engineering. The largest increase is to be seen in the number of medical students. But satisfactory advances are also reported in the Faculty of Arts and in Law and Engineering. Indeed, the total entry of first-year students last session was the largest which we have had for thirteen years, and our total attendance the largest which there has been in the College for twelve years. Altogether, the names of 395 regular students were enrolled for the session, and, if we add to these the teachers of Secondary Schools who, to the number of seventy, attended the College for a special course, and the persons who attended evening classes, we have a gross total of 501 students who during the period under review studied here.

These figures must certainly be regarded as very gratifying and encouraging, especially when one bears in mind the unrest and dissatisfaction which prevail in Ireland with regard to higher education, and the just causes of complaint as to the insufficiency of the provision therefor. The numbers may, I hope, be taken as indicating an increased sense of the impor-

tance of university education, pursued in a university college. Full statistics as to the numbers on our books will be found in the Appendix to this Report.

Of the discipline of the College and the conduct of the students I have once more to report in the most favourable terms.

SCHOLARSHIPS AND STUDENTSHIPS.

We had an unusually large number of candidates at the beginning of the session for Scholarships, Studentships, and other honours, and the answering was in several cases so excellent that special prizes were awarded by the Council, on the recommendation of the examiners. For the First Year Scholarships in Arts pupils from the leading Secondary Schools in Belfast and elsewhere competed, as usual. The successful candidates were supplied by the following schools:—The Royal Academy; The Academy, Ballymena; Campbell College; Kelvin House; the Methodist College, and the Royal Belfast Academical Institution. The first places, on the Classical and Mathematical sides respectively, were taken by boys from the Royal Academical Institution and the Academy, Ballymena, while the Methodist College had the honour of sending in the competitors who gained both the two newly founded Scholarships in Modern Languages and Modern Literature.

The various Scholarships, Studentships, Exhibitions, and Prizes, of public or private foundation, which we possess, amounting altogether in pecuniary value to over £2,400 per annum, have always been of the utmost service to the cause of Ulster education, both as incentives to study, and as affording to such of our Ulster young men and women, as are not possessed of too large a supply of this world's goods, the means of supporting themselves during their College life. There is no reason why, by means of these Scholarships and those of the Royal University, such students may not obtain their education here at a very small rate indeed, or even altogether free. Many have done so. It was a wise provision of the State, when the College was founded, to endow it with means for this purpose, and the beneficence of generous friends of education has materially augmented these means.

Special interest attached, last session, to the new Scholarships founded for the encouragement of modern literary studies. During the three years commencing with the session under review twelve such Scholarships, each of the value of £24, are being offered for competition, the principal subjects of examination being English, French and German. The Scholarships are open, like all our other Scholarships, both to men and women. We have deemed it advisable to take this important step—a new step in our College—in order to meet the needs of those who wish to pursue a modern course of studies, and we have no doubt that experience will prove its wisdom. We have no intention of faltering in our allegiance

to the older learning. Classics and Mathematics continue, and will continue, to occupy the place which they have always held in our curricula, and the Scholarships which have hitherto been awarded for proficiency in them will still be offered for competition. But the new Scholarships are, we believe, called for by the needs of the times, and we have accordingly founded them. Four will be offered for competition at the examinations to be held in October next. We trust, by means of these Scholarships, and in other ways, to build up a School of Modern Learning in Belfast, which will take its place side by side with that for the older studies which we have always fostered, and will, I hope, always continue to foster.

Two further steps which we have just taken will help in the same direction. One, the appointment of a special lecturer in History, we took last session. The Rev. R. J. Semple, M.A., one of the examiners in History to the Royal University, was appointed the lecturer, and we have reason to believe that the prelections which he delivered were much valued. The other new departure—the appointment of an Assistant Lecturer in the department of Modern Languages, a department which is gradually assuming more and more importance here, as in other seats of learning, will be made in time for the beginning of next session. Both these appointments we are enabled to make through the liberality of the Allocation Committee of the Better Equipment Fund to which the College has owed so much since its establishment four years ago.

LADY STUDENTS.

As in previous years, a large number of young ladies attended the College last session. They were distributed over the Faculties of Arts, Medicine, and Music, and it is significant to observe how many of their names appear upon the Scholarship and Prize lists. One, Miss Hilda P. Martin, gained the Senior Scholarship in Natural Philosophy; another, Miss A. Shillington, headed the list of third year scholars in Classics, and also gained one of the Porter Scholarships. Both the newly founded Scholarships in Modern Languages and Modern Literature were also gained by ladies, Miss Jamison and Miss Finnegan.

At the general class examinations, with which the session concluded, the names of ladies are also to be found high up on the lists as prize-winners in Greek, Latin, English, French, German, History, Political Economy, Practical Chemistry, Anatomy, Gynæcology, and Surgery.

The increased disposition to take advantage of the opportunities which are afforded here to women for obtaining a university education is a gratifying sign of our times. Queen's College, Belfast, was the first university college in Ireland to admit women to its class-rooms. We are proud of the fact, and glad that the example which it set many years ago is now being followed by others.

SUCCESSES OF STUDENTS.

The usual long list of high honours was gained by our students at the examinations of the Royal University during the year, and will be found fully recorded in the appendix to this Report. To give a full list of them here would be impossible, the numbers being so very large, and a selection would be invidious. The following honours were gained at other seats of learning:—Miss Annie Shillington, who had been a brilliant student here, gained at Girton College, Cambridge, the Cloth-workers' Exhibition of £60 a year for three years and one additional term; Mr. C. W. L. Alexander, one of our best Engineering students, the Miller Scholarship of £120 and the James Forrest Gold Medal of the Institute of Civil Engineers, London; Dr J. S. O'Neill, now a Lieutenant in the I.M.S., the Maclean Prize at Netley, on the completion of his summer course; Mr. J. H. Edgar the King's Inns Exhibition of £21 per annum for three years; and Mr. W. H. Davey, M.A., first place at the final examination for admission to the Irish Bar.

RELIGIOUS SUPERVISION.

During the session the College had upon its roll members of all the chief religious bodies to be found in Ulster. Since its foundation its doors have been open, without let or hindrance of any kind, to men and women of every creed and class, and even the breath of slander has never whispered that there has at any time been the slightest attempt on the part of the College, or of anyone within its walls, to tamper with the faith of the students, or to weaken the convictions implanted in them from childhood. On these lines the College has always gone, and on these lines it will, I trust, always be found proceeding.

As usual, the excellent provisions made in the College Statutes, for the supervision of the students and their instruction in the tenets of their respective Churches, were faithfully carried out by the several Deans of Residences who have been appointed for that purpose by Warrant under the Royal Sign Manual. At the commencement of the session each Dean was furnished by the Registrar, according to the usual custom, with a list of the names and addresses of the students belonging to his Church, and I now append the reports which I have received from the Deans as to the manner in which their responsible duties were discharged, and as to their opinion of the conduct of the students committed to their care. I give the reports in the order of the seniority of the Deans:—

" St. Andrew's Rectory,

" University-square,

" Belfast, June 14, 1905.

" DEAR MR. PRESIDENT,—I am happy to be able to make an unexceptionable report of the conduct and intercourse of the Church students of Queen's College, Belfast, for the past session.

"In accordance with what is now a happy custom, the various classes of students met the Deans at the beginning of the session in the Union Buildings, where a most enjoyable and profitable conversazione was held. At this meeting useful and interesting speeches on the social and College life of students were delivered by the Deans, and friendly intercourse of an edifying and pleasing character was entered upon. Many of the Professors, with members of their families, honoured the conversazione with their presence, and the best impressions were left on the minds and hearts of the young men.

"I remain, dear Mr. President,

"Your very faithful Servant,

"S. EDW. BURBY, M.A., LL.D., T.C.D.,

"Dean (C. of I.), Queen's Coll., Belfast."

"College Park, Belfast,

"13th June, 1905.

"DEAR MR. PRESIDENT,—I have much pleasure in reporting that the conduct and character of the Presbyterian students during this session have been, as far as known to me, most satisfactory.

"I conducted a weekly Bible Class in the College, and was much pleased with the diligence and attention of the students who were able to come to it. We always find difficulty in getting any hour for our class that is not taken up with the ordinary classes of the College. I think that the Council should arrange the College classes so that on one hour in the week all students might be free to attend the classes of their Deans of Residences.

"I am,

"Yours faithfully,

"MATTHEW LEITCH,

"Dean of Residences for the students of the
Presbyterian Church in Ireland."

"Methodist College, Belfast,

"13th June, 1905.

"DEAR PRESIDENT HAMILTON,—I have much pleasure in stating that the students under my care, to the best of my knowledge, have conducted themselves in a very praiseworthy and proper manner during the past year.

"I am,

"Very faithfully yours,

"WM. NICHOLAS, B.D.,

"Methodist Dean of Residences."

"Adelaide Park, Belfast,

"June 7, 1905.

"DEAR DR. HAMILTON,—I have pleasure in reporting that the conduct of the students on my list has been throughout the session entirely satisfactory.

"Yours faithfully,

"DOUGLAS WALMSLEY.

LOSSES AND GAINS.

The College sustained several much-regretted losses during the year. By the death of Dr. W. A. McKeown, it was deprived, last summer, of a Lecturer in Ophthalmology and Otology who stood in the front rank of the oculists of his day. Largely through his exertions the Ulster Eye, Ear and Throat Hospital was established and gained its high reputation. He was a Senator of the Royal University from the time of its foundation, and had been a Senator of the Queen's University for several years. It is fitting that I should place on record here the minute which the Council adopted on the announcement of his death :—

"We, the Council of Queen's College, Belfast, hereby record our sense of deep regret at the death of Dr. William A. McKeown, who held the Lectureship in Ophthalmology and Otology from its foundation in 1896. His eminence as a specialist in these branches of medical science, his original work in the treatment of cataract, and his gifts as a teacher, made his tenure of the Lectureship highly advantageous to the College.

"Dr. McKeown's disinterested zeal in the cause of Irish education, and his intimate knowledge of many of its aspects were widely recognized.

"We wish to take this opportunity of expressing our deep sympathy with Mrs. McKeown in her personal bereavement."

To the Lectureship rendered vacant by Dr. McKeown's demise, Dr. Cecil Shaw was appointed out of a large number of candidates. Dr. Shaw was educated here, and afterwards studied at Paris, Vienna, and other centres of ophthalmological research. As one of the surgeons of the Belfast Ophthalmic Hospital he has gained a high reputation as a specialist in diseases of the eye and ear, and already, though so recently appointed to our College Lectureship in these subjects, he has proved that he possesses also the qualifications of a successful teacher.

Here I may perhaps mention that the election of Dr. Shaw is the fourteenth appointment of an *alumnus* of our own to a position on our staff, which has taken place during the sixteen years in which the Presidency of the College has been in my hands. During the previous forty years of its history the number of Queen's men so appointed was five.

Another loss which we sustained during the year, and which was very keenly felt, was that caused by the resignation, last autumn, of Professor Lorrain Smith, on his appointment to the Chair of Pathology in the Victoria University of Manchester. It may be truly said that no one who has ever occupied a place in our professoriate, during the entire history of the College, has held a higher position in the regard either of his colleagues or students, or has left us amid more general sorrow. It was by his exertions that our department of Pathology and Bacteriology was organised, and to him it owes the position of public usefulness and widespread reputation to which it has attained. But he did not confine his labours to his own department. In the work and the prosperity of the entire College he took a real interest, and he was

unsparing in his labours on its behalf. As a member of Council, and of the Library Committee, and as one of the honorary secretaries of our Better Equipment Fund, he rendered yeoman service to the College. On his retirement from his Chair he was entertained at a public banquet in the city, and the Council, on the 17th November last, showed their sense of the services which he had rendered to us by the adoption of the following minute :—

"The Council of Queen's College, Belfast, desire to express their satisfaction at the appointment of Professor J. Lorrain Smith to the Chair of Pathology in the Victoria University of Manchester, and at the same time their great regret at the loss which Queen's College, Belfast, has sustained by his removal to England. Appointed Lecturer on Pathology in 1885, Professor Lorrain Smith's conspicuous ability and energy in developing his department of the Medical School paved the way, on the endowment of a Chair of Pathology by the late Sir James Masgrave, Bart., in 1901, for his occupying the Chair with that distinction which his previous career had promised.

"Professor Lorrain Smith's services in the fields of education and of medical science, and in the administration as a member of the Council of the affairs of Queen's College, as well as his energetic promotion not only of study and research, but of recreation and physical exercise among the students of the College, deserve the fullest recognition by his colleagues and their best wishes for a long and fruitful continuance of his valuable labours."

To the Chair left vacant by the resignation of Professor Smith the Crown was pleased to appoint Dr. William St. Clair Symmers, who for seven years had been Professor of Pathology and Bacteriology in the Government Medical School, Cairo. Dr. Symmers has had a lengthened training in Pathology. After a highly distinguished college course and a short period of general practice, he spent nine months in Paris at the Pasteur Institute, the time being devoted to bacteriological research of various kinds. He then became pathologist to the General Hospital, Birmingham, and, later on, pathologist at the Lancashire County Asylum, Manchester, and resident medical officer at the West Brompton Hospital for diphtheria. He was next assistant bacteriologist to the well-known Lister Institute of Preventive Medicine. Finally, he was placed by the Crown in the Chair of Pathology and Bacteriology in the Government Medical School at Cairo, and appointed pathologist to the Government Hospital, Kasr-el-Aini; and in the discharge of the duties of these posts he spent the past seven years. He instituted the Pathological Museum of the Cairo Medical School, and supplied it with somewhere about 600 preparations collected and mounted by himself. A still more notable service he rendered to the entire country. A serious outbreak of cattle plague having occurred in Egypt, he was entrusted by the Government with the foundation and direction of an institute for the production of cattle plague serum; and Sir Horace Pinching, director-general of the Cairo sanitary service, testifies to the splendid work which he did there, in the face of countless difficulties.

Professor Symmers has been appointed to be Joint Lecturer in Medical Jurisprudence in Queen's College, along with Dr. Thomas Houston.

Just as our session closed, another breach was made in our ranks by the resignation of Professor F. C. Boas, on his appointment as a Divisional Inspector of Higher Education by the London County Council. Professor Boas had been but a short time with us, having succeeded the late Professor MacMullan in 1901; but, brief as his term of office was, it was long enough to enable him to do much excellent work not only in the Chair of English Literature, and in the College Library, of which he had charge for two years, but on the Council, of which his colleagues recently appointed him a member, and in the general life of the College. No professor could have thrown himself more whole-heartedly into the difficult work of Irish education, and none could have been more truly loyal to the College or more incessantly anxious to promote the interests of his students.

HONOURS, &c.

During the year several of our professors and *alumni* have been the recipients of high honours of various kinds, which it is a pleasure, as well as a duty, to chronicle here. Professor Sir William Whitla, M.A., M.D., has had the honorary degree of LL.D. conferred upon him by the University of Glasgow; Professor Graham, M.A., has received the honorary degree of LITT.D. from the University of Dublin; Dr. Henry O'Neill, B.L., founder and curator of our Museum of Sanitary Science, has been appointed High Sheriff of the city of Belfast; Professor Ernest M'Bride has been created a Fellow of the Royal Society; Professor Symington, M.D., F.R.S., has been appointed by the India Office Examiner in Applied Anatomy and Physiology for the Indian Medical Service, and Examiner in Anatomy by the Board of Trinity College, Dublin; and Professor Gregg Wilson, PH.D., D.SC., Examiner in Zoology to the Royal College of Science, Dublin. The following professors were appointed, this year, Fellows of the Royal University:—In English, Professor Boas, M.A.; in Mathematics, Professor Dixon, F.R.S.; in Classics, Professor Dougan, M.A.; in Chemistry, Professor Letts, D.SC.; in Physics, Professor Morton, M.A.; in Mental Science, Professor Park, D.LITT.; in Natural History, Professor Gregg Wilson, D.SC.; in Anatomy (Medical Fellowship), Professor Symington, F.R.S. The following were appointed Examiners in the University:—In Law, Professor Baxter, LL.B.; in Midwifery, Professor Byers, M.D.; in Political Economy, Professor Graham, LITT.D.; in Medicine, Professor Lindsay, M.D.; in Physiology, Professor Milroy, M.D.; in Materia Medica, Professor Sir William Whitla, M.D.; in Pathology, Professor St. Clair Symmers, M.B.

THE LIBRARY.

The following report on the working of the Library during the year has been furnished to me by the Librarian :—

MY DEAR MR. PRESIDENT,

"I send, as in the previous session, a short report on the progress of the Library during the past year.

"During the Long Vacation of 1904 a number of improvements in the general equipment of the building were made, which have added considerably to the comfort of readers, and have improved the appearance of the central hall. Additional shelves have also been provided in the librarian's room, which, it is hoped, will give space for about 1,000 new volumes.

"As will be seen in detail in the appendix to your Report, the growth of the Library, by presentation and by purchase, has been even more rapid than in the previous years. Additions have been made in every department, and I may mention as a supplement to the figures in the appendix that 33 volumes and 18 instrumental parts were added to the Musical Library, which now contains 173 volumes and 25 instrumental parts.

"A volume of a unique character has been placed in the Library during the past session. This is an album containing the portraits of all past and present Presidents, Professors, and officers of the college, so far as they could be obtained. The idea of forming such a collection originated with yourself, and has been most successfully carried out. Professor Dougan supplied a felicitous Latin title, and Messrs. Mayne and Boyd, the college printers, designed and bound the album with much artistic skill.

"Another artistic addition to the Library is due to the kindness of Mr. J. Vinycomb, M.R.I.A., who designed a special book-plate for insertion in our volumes.

"The financial scheme adopted last session has continued to work well and has needed but slight modification. The year has been one of advance in various ways, and the Library has been largely used by members of the college and other readers. But still greater progress may be expected in the coming session, when electric light will, it is expected, be installed, and the Library will thus be able to be used for longer hours during the winter. It is, therefore, in every hope of an unprecedented development in the near future of the usefulness and influence of the Queen's College Library that I regretfully lay down the office of Librarian, which, during my tenure of it, has been to me a source of unmixed pleasure and satisfaction.

"I remain, yours very truly,

"F. S. BOAS."

A complete list of the presentations made to the Library during the year, some of which were very valuable, will be found in the appendix. Altogether, there were added during the year 899 volumes, 190 parts, 164 pamphlets, and 2 Geological maps.

THE MUSEUMS AND LABORATORIES.

The various museums have been carefully maintained, under the care of their several Curators, during the year.

Regarding the Natural History Museum, Professor Gregg Wilson, PH.D., D.SC., the Curator, reports as follows :—

"The Natural History Museum has been considerably improved during the course of the year, but more space is required for type-collections, and especially for the Botany collection. It is hoped that the requisite

cases will be provided in a new gallery in the North room, which is to be erected this summer. The Zoology type collection has been catalogued, and most of the specimens labelled, so as to be of service to students. A large part of the Geology collection is in course of arrangement, so that the contents of the drawers under the glass cases will be of use for study and for the illustration of class lectures.

"The Natural History Department has been extended by the erection of a two-storey structure above the north cloister of the main building. The addition includes a laboratory about 80 feet long for junior classes in Biology, smaller laboratories for classes in practical Geology and for advanced classes in Biology, and private rooms for the Professor and his demonstrator. All of these are well fitted for the purposes to which they are assigned, and are provided with cupboards, cases, shelving, &c., for the convenience of workers. For many years it had been felt that it was not proper that the practical classes of the department should have to be conducted in rooms equipped and used for other purposes, and available only occasionally, and the new buildings undoubtedly add greatly to the efficiency of the College.

"During the winter session Mr. Gough gave a course of ten evening lectures on Geology. These lectures had special reference to local conditions, and were greatly appreciated by the class. The average attendance was about twenty-five.

"Mr. Gough also conducted an evening class in practical Geology. One section studied the naked-eye characters of the commoner minerals, rocks, and fossils, while another, consisting of a few more advanced students, devoted themselves to microscopic work. This class met twelve times, and the number of members was eleven."

The Medical Museum continues to receive additions to its treasures through the thoughtfulness of members of the profession. The Materia Medica Museum is reported to contain a good collection of specimens, which have been arranged and named in accordance with the new British Pharmacopœia. The Museum of Sanitary Science continues to receive the anxious and kindly attention of its founder, Dr. Henry O'Neill, B.L., who reports that it has been "maintained in good order and efficiency during the year." A goodly list of donations, with names of the donors, to all the Museums, will be found in the appendix.

The Chemical, Physical, Anatomical, Physiological, Pathological, and Pharmaceutical Laboratories were all busily employed during the year.

THE "BETTER EQUIPMENT FUND."

Of this great fund, the establishment of which has been an outstanding feature of the recent life of the College, I cannot furnish a better account than is supplied in the report of its work which I subjoin, and which clearly deserves to be given in full in these pages. This report was submitted to a meeting of its subscribers last month, at which Sir Otto Jaffé, J.P., ex-Lord Mayor of Belfast, occupied the chair, and was unanimously adopted.

"The Executive Committee of the Fund for the Better Equipment of Queen's College, Belfast, have pleasure in laying before the subscribers an account of the working of the Fund during the four years which have elapsed since its establishment.

The meeting inaugurating the Fund was held on 16th April, 1901, and will long be remembered as one of the largest and most enthusiastic assemblages ever held within the precincts of the College. It may be convenient to set out here the resolutions which were adopted at it. They were as follows:—

I. Moved by the Lord Mayor of Belfast (The Right Hon. Sir Daniel Dixon, Bart., D.L.), and seconded by Mr. Edward Coey, J.P.—

"That the President of Queen's College (The Rev. Thomas Hamilton, D.D., LL.D.) do take the Chair."

II. Moved by the Marquess of Londonderry, K.G., seconded by Professor Lettis, D.Sc., M.D., and supported by Professor Dill, LL.D., LL.D.—

"That in the interests of higher education and research it is most desirable materially to strengthen the equipment of Queen's College, Belfast."

III. Moved by the late Marquess of Dufferin and Ava, K.P., seconded by the Right Hon. W. J. Pirrie, D.L., LL.D.—

"That a fund be established, to be called the 'Fund for the Better Equipment of Queen's College, Belfast,' and that an earnest appeal be made to the people of Belfast and the North of Ireland, and to all old students of the College and their friends, for contributions thereto."

IV. Moved by the late Sir James Musgrave, Bart., D.L., and seconded by Mr. G. W. Wolff, M.P.—

"That the gentlemen whose names are on the printed list be requested to act as the General Committee of the fund, with the Lord Mayor of Belfast as chairman, with power to add to their number; that they shall appoint an Executive Committee, to whom shall be entrusted the raising of the fund, and who also shall have power to add to their number; that Professor Purser, LL.D.; J. Lorrain Smith, M.A., M.D.; and T. C. Houston, LL.B., be appointed Hon. Secretaries, and Sir Otto Jaffe, J.P., High Sheriff of Belfast, and Mr. J. Taylor Blackwood, J.P., Director, Ulster Bank, Belfast, Hon. Treasurers."

V. Moved by Mr. Robert Thompson, J.P., President of the Belfast Chamber of Commerce, seconded by Professor Symington, M.D., F.R.S.—

"That the allocation of the moneys which shall be raised, other than those which may be ear-marked for particular objects, shall be entrusted to a committee consisting of the President, six gentlemen nominated by the Executive Committee, and six members of the College Staff nominated by the Council."

VI. Moved by Sir Otto Jaffe, J.P., High Sheriff of Belfast, seconded by Sir William Whitla, M.A., M.D., LL.D.—

"That this meeting strongly urges the Irish Government to obtain from the Treasury a grant corresponding to the amount which may be subscribed to the fund now established, so that the College may be provided with an equipment fully adequate to the great work which has been committed to it."

VII. Moved by the late Mr. David Graham Barkley, LL.D., seconded by Mr. John McConnell, J.P.—

"That copies of these resolutions be sent to His Excellency the Lord Lieutenant, the Chief Secretary, and the Ulster Members of Parliament."

The Committee lost no time in setting to work to accomplish the task entrusted to it. An appeal was issued, enumerating the most pressing wants of the College, and asking for the means to supply them. This document was signed by the Lord Mayor of Belfast (the Right Hon. Sir Daniel Dixon, Bart., D.L.); the late Marquess of Dufferin and Ava, Chairman of the Visitors of the College; the President of Queen's College (the Rev. Thomas Hamilton, M.A., D.D., LL.D.), and the Honorary Secretaries and Honorary Treasurers.

Several circumstances combined to retard the success of the Fund at the outset of its career. The Irish University Question was just then in one of its keenest phases and distracted the attention of the public. Within less than three months after the inauguration of our Fund, a Royal Commission was appointed to inquire into this subject, and, if possible, devise a settlement. The long-continued neglect of the Government to fulfil their duty to the College was also a serious barrier in our path. Notwithstanding all these untoward circumstances, the appeal of the Committee met with a hearty reception from many who recognised that Queen's College has strong claims, not only on the Government, but on its own alumni and on the people of the North of Ireland. When the University Commission visited Belfast in 1902, we had the pleasing duty of announcing to them, through a deputation of our number, that already we had made very substantial progress with our work.

Altogether, the sum of £29,633 0s. 0d. has been subscribed to the Fund up to the present time. Interest received from the bank and dividends from stock amount to £407 17s. 8d., making altogether £30,040 17s. 8d. Of the amount subscribed, £2,093 remains unpaid, but this will, it is expected, be received when the final instalment is called for.

The following very important and much-needed additions to the Equipment of the College have already been made by the help of the Fund.

I. "The Musgrave Chair of Pathology" has been founded by Government, the necessary endowment having been provided by the late Sir James Musgrave, Bart., D.L., and the College Statutes having been altered for the purpose by a King's Letter.

II. The "Purser Studentship" has been founded, for the promotion of teaching and research in Mathematical Science, in memory of the late Professor John Purser, LL.D., the funds for the purpose having been provided by Professor Frederick Purser, M.A., F.T.C.D.

III. "The Riddel Demonstratorship in Pathology and Bacteriology" has been founded by means of moneys contributed by the Misses Riddel, Beechmount, Belfast.

IV. A large, well-made and well-enclosed Playing Field for the students has been provided, Sir Daniel Dixon lending valuable help in this important work.

V. "The Mitchell Organ," presented in memory of the late Mr. W. C. Mitchell, J.P., by his family, has been erected in the Examination Hall.

VI. A Lectureship in Music has been founded, in connection with which classes are held in Harmony, Counterpoint, and Musical Form.

VII. A Library of Music has been established and is largely used.

VIII. An Assistant in the Department of Botany has been provided.

IX. A Lecturer in History has been provided.

X. Three tubes of Radium, containing in all 60 milligrammes, have been presented by Sir Otto Jaffe, J.P., ex-Lord Mayor of Belfast.

XI. A scheme for the establishment of a Faculty of Commerce in the College has been drawn up by the Belfast Chamber of Commerce, after

conference with the College authorities, and several munificent subscriptions have been promised in connection therewith, and, although it has not been found possible to proceed with it without further help, it is most earnestly hoped that this very important project will ere long be carried out.

XII. A grant has been made towards providing a much-needed Assistant in the Department of Modern Languages.

XIII. An admirable and completely fitted Biological Laboratory, for part of the cost of which the Fund made itself liable, has been erected.

XIV. Several minor, but by no means unimportant, grants have been made by the Allocation Committee.

A letter, dated 9th July, 1904, was received from the Right Hon. W. J. Pirrie, stating that he had decided not to proceed with the Laboratories for Physics and Engineering which, as announced at the Inaugural Meeting, he had undertaken to erect. At the same time he enclosed a cheque for £7,500, a joint contribution from Lady Harland, Mr. G. W. Wolf, M.P., and himself, to the Equipment Fund. The Committee thanked the donors for their handsome gift and decided to devote it to the departments of Physics and Engineering, and they have made arrangements for proceeding as soon as possible with the erection of such laboratories as the means at their disposal will allow.

We regret to learn that the College continues not to receive the support from State Funds to which it is entitled. It is provided by the Act of Parliament which established the Queen's Colleges (6 and 7 Vict., cap. 66), "That the Commissioners of Public Works in Ireland for the time being shall be Trustees for the purpose of purchasing or providing, as hereinafter mentioned, any buildings, lands, tenements, or hereditaments that may be necessary for the said Colleges, and the sites thereof and the premises to be occupied therewith respectively, and for erecting thereon suitable buildings, and for repairing, enlarging, and improving the same from time to time." An indefeasible claim upon the State in the matter of buildings is here constituted, and this claim is materially strengthened by the action of the Treasury in 1893, making further building grants to our College dependent on the obtaining of support from the locality, and by the generous response given to this challenge by the people of Belfast through this Fund. We cannot think that the Government will refuse to satisfy claims so strong, reinforced, as they are, by the admitted success of our College in carrying out the work assigned to it in its Charter.

But the Committee most earnestly trust, on the other hand, that nothing will be allowed to damp or diminish the zeal of the public of Belfast in discharging the duty which they undoubtedly owe to Queen's College. In these times, when the nation is beginning to recognise the value and necessity of education as it never did before, we must see to it that the interests of Belfast are not allowed to suffer. The only University College which we possess ought to be equipped and maintained up to the highest point of efficiency. Belfast requires and deserves this, and should be satisfied with nothing less.

There are many things yet urgently needed, and which ought not to be postponed. Those most pressingly required are as follows:—

I. The building devoted to Chemistry loudly calls for completion, and the Treasury should be urged to finish this work, begun by them fourteen years ago and still standing unfinished.

II. The Library is in great need of funds to enable it to meet the increasing demands made upon it by all departments of the College.

III. The fact that the College has only one Chair to deal with the three great subjects of Zoology, Botany, and Geology has been often

commented on. As recommended by the Royal Commission, three teachers ought to be provided.

IV. History requires, and should have, a Lecturer to itself.

V. All Modern Languages should not be left in charge of a single teacher. As has been frequently pointed out, one or two assistants should be permanently provided.

VI. A Chair or Lectureship of Education is much required. The College has recently been strongly pressed to establish lectures on Education (to prepare students, who intend becoming teachers, for the Diploma in Teaching), and the means for doing so ought to be placed at its disposal.

VII. Assistants to Professors are still much needed in nearly all the departments.

VIII. Apparatus and equipments of various kinds are much required in several departments. The amount available for these purposes from the College funds is very limited.

IX. General contributions, to be voted by the Allocation Committee according to the needs of the College from time to time, are required. This Committee consists of the President of Queen's College, Belfast; Mr. J. Taylor Blackwood, J.P.; Professor Boas, M.A.; Professor Dill, Litt.D., LL.D.; Mr. T. O. Houston, LL.B.; Mr. R. T. Martin, B.A.; Sir Otto Jaffe, J.P.; Mr. R. Kyle Knox, J.P., LL.D.; Professor Lettis, Ph.D., D.Sc.; Mr. John M'Connell, J.P.; Professor Fitzgerald, B.A., Assoc.M.T.C.E.; Professor Symington, M.D., F.R.S.; and Professor Sir William Whitla, M.A., M.D., LL.D.

Altogether, there is still a large field open for the exercise of public beneficence towards the College, and the Committee earnestly trust that the Fund will continue to be supported, so that the work so well begun in 1901, and so successfully carried on ever since, may still proceed with vigour. The operations of the scheme during the past four years, as now detailed, show what can be done by comparatively few, and in the face of serious difficulties. And its direct results are probably surpassed in value by the indirect. In the opinion of those best qualified to judge, the Fund has been of more advantage to the College and its work than any other public movement ever undertaken on its behalf, and it is only required now that the task so heartily begun, and so perseveringly carried on for the past four years, shall be prosecuted on the same lines, and in the same spirit, to secure a larger and more adequate equipment for a College with the efficiency of which the prosperity and advancement of the North of Ireland are so intimately bound up.

We cannot close this Report without referring very regretfully to the blanks made by death in the ranks of the supporters of the Fund during the four years of its history. The sad list includes the names of the late Marquess of Dufferin and Ava, whose speech at the meeting of 1901—the last that he delivered within our walls—was a fit ending to the many important services which he rendered to Queen's College during his long and brilliant career: Sir James Musgrave, one of the earliest and most generous supporters of the Fund, whose memory is fittingly perpetuated by the Musgrave Chair of Pathology which he founded: Professor Purser, one of our first Secretaries, whose name also is happily commemorated by the Purser Studentship: Dr. Hugh Hyndman, a staunch friend of Queen's College from the days of his student life and a most regular attendant at our meetings: Sir William MacCormac, one of the most famous of Queen's-men: Dr. D. G. Barkley, one of our earliest and most generous subscribers, and Dr. Praeger, the premature ending of whose promising career was nowhere more deplored than in

the College which he so much loved. By the removal to Manchester of Professor Lorrain Smith we also lost a Secretary as unceasing in his interest in the Fund as he was unwearied in labour on its behalf."

The Chairman of the Executive Committee of this Fund (Sir Otto Jaffe, J.P.), the Honorary Secretaries (Professor Symington, M.D., F.R.S., and Mr. T. C. Houston, LL.B.), the Honorary Treasurers (Sir Otto Jaffe, J.P., and Mr. J. Taylor Blackwood, J.P.), and the members of the Committee, deserve and have the grateful thanks, not only of the College, but of all its members everywhere for their willing and unremitting labours on its behalf, labours which already have had a most important influence on our life and work, and which, I trust, are destined to have in the future still more far-reaching results.

MUSIC.

In addition to the lectures on Harmony, Counterpoint and Musical Form, which were delivered in the College by Dr. Lawrence Walker, our Lecturer on Music, nine Chamber Concerts and Recitals were given in the Examination Hall during the winter, under the direction of Dr. Walker. These were largely attended. The Library of Music has been used by many readers, and several valuable additions have been made to it.

PEDAGOGY.

In April last the desirability of providing, in the College, lectures on education was strongly urged upon the Council by a deputation from "The Irish Association of Women Graduates and Candidate Graduates," consisting of Miss L. A. Walkington, M.A., LL.D., President of the Association; Miss M. J. Hanna, B.A.; Miss Jane M'Cutcheon, B.A., and Miss Edith Miskelly, B.A. They represented that, although a diploma in teaching is granted by the Royal University, it has never yet been obtained, probably because there is no provision in the Colleges for preparing candidates for it. Nor, they added, are there any facilities provided in Belfast to enable teachers to procure registration from the Education Department, Whitehall. Consequently, those who desire this registration must go elsewhere to obtain the requisite qualification. The Council were much impressed by the statements laid before them by the deputation, and appointed a Committee to consider the matter and report at an early date.

THE COLLEGE UNION

continues to discharge most usefully the functions for which it was established. The president for the session was Mr. S. T. Irwin, B.A., M.B. The membership is growing, and the impor-

tance of having a building so commodious and convenient, which not only affords excellent accommodation to the various students' societies and clubs for their meetings, but contains well-appointed and comfortable reading-rooms, library, dining and refreshment rooms, bath room, cloak room, and recreation rooms, is increasingly felt year by year.

The other College societies appear to have had busy and interesting sessions. The Literary and Scientific Society has now completed the fifty-sixth year of its history, and had for its president Mr. W. H. Davey, M.A. One of its debates during the winter, which evoked unusual interest, will long be remembered. This was an "Inter-College debate between the Philosophical Society of Queen's College, Cork, and the Literary and Scientific Society of Queen's College, Belfast." The question discussed was :—"That the system of education pursued in the newer universities is alone suited to the requirements of the age." The chair was occupied by Mr. R. J. M'Mordie, M.A., and the speakers were Messrs. Dillon, Kelleher, Ridge, Mockler, and Gallaher, of Cork; and Messrs. Davey, Leighton, Johnstone, Arnold, and Rutherford, of Belfast.

The president of the Medical Students' Association for the year was Mr. C. G. Lowry, M.B., and it had a busy and useful winter.

"The Association of Old Belfast men in London" had for its president this year Sir David Barbour, K.C.M.G., K.C.S.I., and one is glad to see by the report of the proceedings at the annual dinner on June 20th, that the loyalty and the love for their *alma mater* which have so long characterised these London Belfast-men continues unabated.

PRESENTATIONS.

The College received several welcome presentations during the year.

An excellent portrait of the late Sir James Musgrave, Bart., D.L., was given us by his brother, Mr. Henry Musgrave, and now hangs in our Examination Hall to remind us of the familiar features of one of our truest friends, the munificent founder of "The Musgrave Chair of Pathology."

A most interesting series of portraits has been obtained for the Library and placed in safe keeping there—a collection of the portraits, so far as they could be procured, of those who have held office in Queen's College since its foundation sixty years ago. It contains in all between sixty and seventy portraits, beginning with that of the first President (the Rev. Pooley Shulldham Henry, D.D.), and ending with that of the most recent accession to the staff. The book is a most interesting addition to the records of the College, and will become more

and more valuable as time goes on. A preface was contributed by the Librarian (Professor Boas, M.A.). The book has been sumptuously got up. Its entire preparation was entrusted to the College printers, Messrs. Mayne & Boyd, who turned out a truly splendid work. The title given to it is "*Collegio Reginali Belfastiensi Officio Conjunctorum Imagines.*" The sixty or seventy portraits recall many personalities with which the College courts were once familiar, but some of which are almost unknown to the present generation.

Another gift, which is at once artistic and useful, was presented to us by Mr. John Vinycomb, M.R.I.A. It is a very beautiful book-plate for use in the library. Upon it the College arms are emblazoned, encircled by those of the city, with the historic motto underneath—"Pro tanto quid retribuamus," the whole being surrounded by a quantity of artistic work, designed and executed with Mr. Vinycomb's well-known taste and accuracy, and inscribed "*Ex Libris Queen's College, Belfast, 1905.*" The Library Committee unanimously and very cordially voted their thanks to Mr. Vinycomb for what is at once a very handsome and very useful gift, all the more acceptable because it comes from the father of one of the most distinguished students of the College.

CONCLUSION.

I have thus sketched briefly the history of the College during the past academic year. The facts which I have adduced show, I think, not only that it has not fallen below the great traditions of its early years, but that it has advanced materially in prosperity and usefulness, and in public appreciation and support. It suffers seriously from two causes, and has so suffered for many years. The University arrangements of this country, to which it is linked, are marred by serious defects which have frequently been pointed out but are not yet remedied. And, in addition, notwithstanding all that has been done for the College in recent years, it still needs much larger pecuniary support. We are hampered and retarded by these two hindrances in a manner which can only be realised by men who are engaged, as we are, from year to year, and from day to day, in the actual work of higher education. I have forbore to burden the pages of this Report with details regarding our needs. They have been frequently published, and need not now be repeated. But I should be untrue to the duty which I owe, not only to the College, but to Belfast and the North of Ireland, were I to remain wholly silent regarding these things, when reporting officially to Your Majesty, as I have now the honour of doing. Without saying more, I can only now express the hope that in some way or other we shall ere long see both these impediments, which so seriously block our way, removed. The State can do much for us, much that the State only can do. Many of the generous-hearted people of

the North of Ireland have rendered us most valuable aid, and they will, I am confident, not fail us so long as they find us busy in the service of the country, and so long as we stand firmly, as I trust we shall always stand, on the broad basis which has ever been one of our proudest boasts, opening our doors freely to all who are desirous of treading the peaceful paths of learning, no matter what their creed, no matter what their class, no matter what their sex.

I have placed the usual statistical and other tables in the Appendix, together with a list of the Executive Committee and other office-bearers of the "Fund for the Better Equipment" of the College, and a full list of the subscriptions thereto, and beg to subscribe myself

Your Majesty's

Most dutiful Servant,

THOMAS HAMILTON.
